

Life Expectancy: 2015 update

ONS released the local authority update of UK life expectancy, healthy and disability free life expectancies for 2013-15 on 29 November 2016 <http://www.ons.gov.uk/releases/healthstatelifeexpectanciesuk2013to2015>

Life expectancy at birth continues to rise in both males and females in Croydon with the gap between males and females now at three years compared almost 4 years in 2001-2003. In 2013-2015, Croydon had a significantly higher life disability-free life expectancy in males than London and England.

Life expectancy at age 65 also continues to rise in both males and females.
