Diagnosed Conditions in Croydon GPs

Obesity

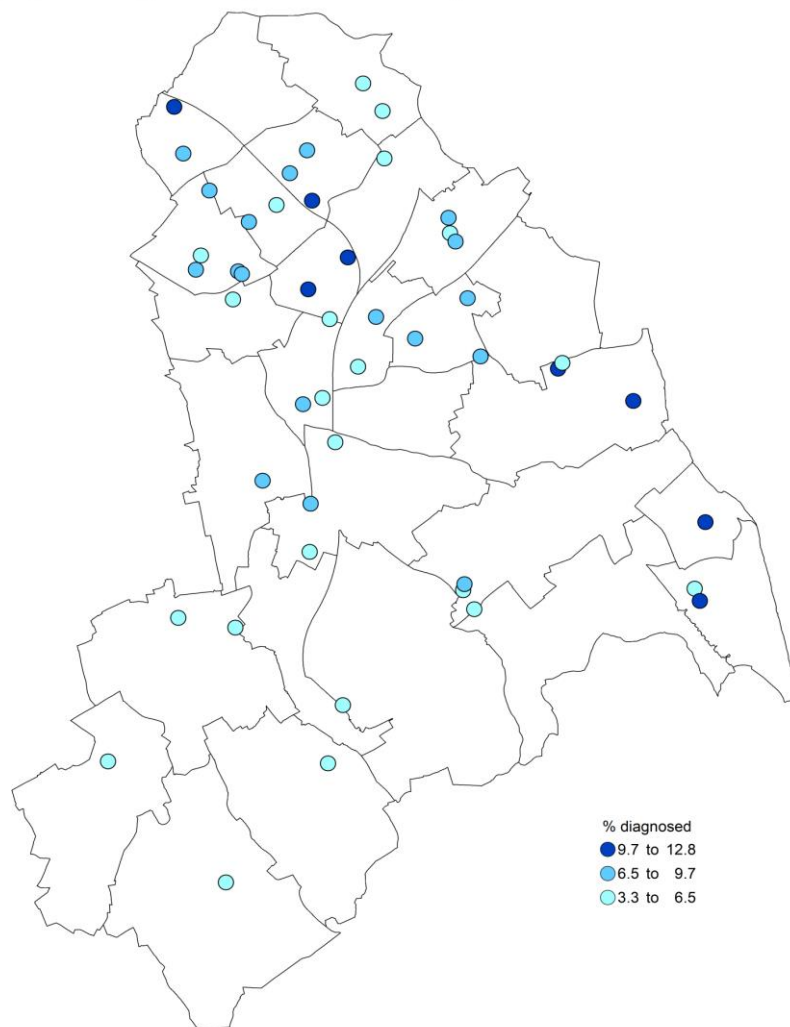

22,749 adults (aged 18+) registered with a Croydon GP have been diagnosed with obesity, this is 6.8% of the GP register

Since last year, the number of adults diagnosed with obesity has decreased by 9,261 people and 2.3 % points. This is likely to be due to the reduction in face-to-face consultations during the pandemic; in order to be included on the obesity register, a patient must have a BMI of 30 or more recorded in the 12 months up to and including the reporting period end date.

Diagnosed prevalence ranges from 3.3% - 12.8% across Croydon GPs
