Neighbourhoods of Croydon

An overview of some key information, November 2025

Introduction

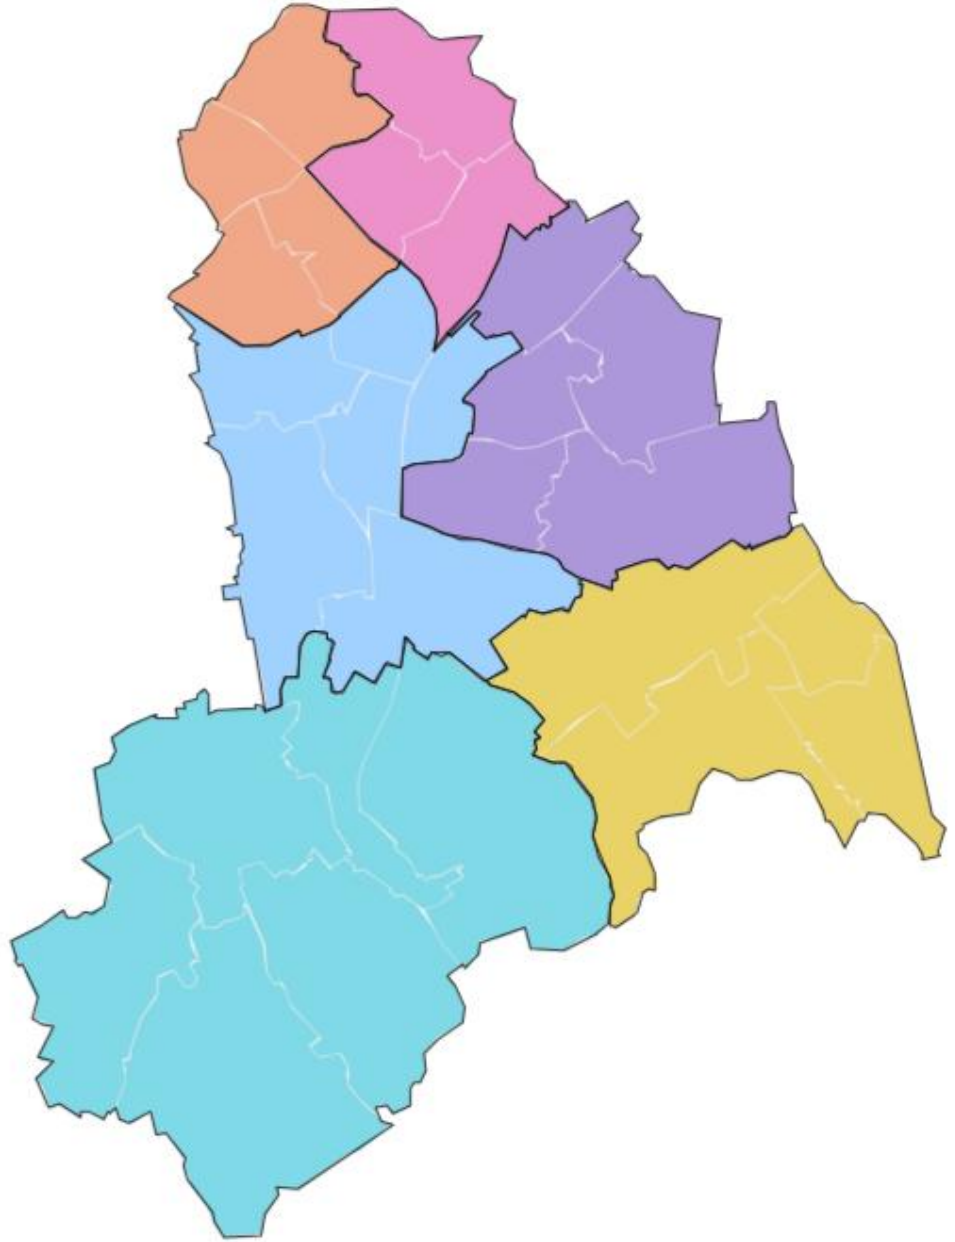

Croydon is split into;

- Three localities; North, Central and South
- Six neighbourhoods; North East, North West, Central East, Central West, South East and South West.

This pack aims to give an overview of some of the key population and health characteristics of these neighbourhood areas.

Indicators have been selected to present a range of indicators across health and wellbeing, demography, social and environmental determinants, but these are not exhaustive.

For more details on each of the indicators chosen and the data by neighbourhood please see the appendix.

North West: health sites

Wards

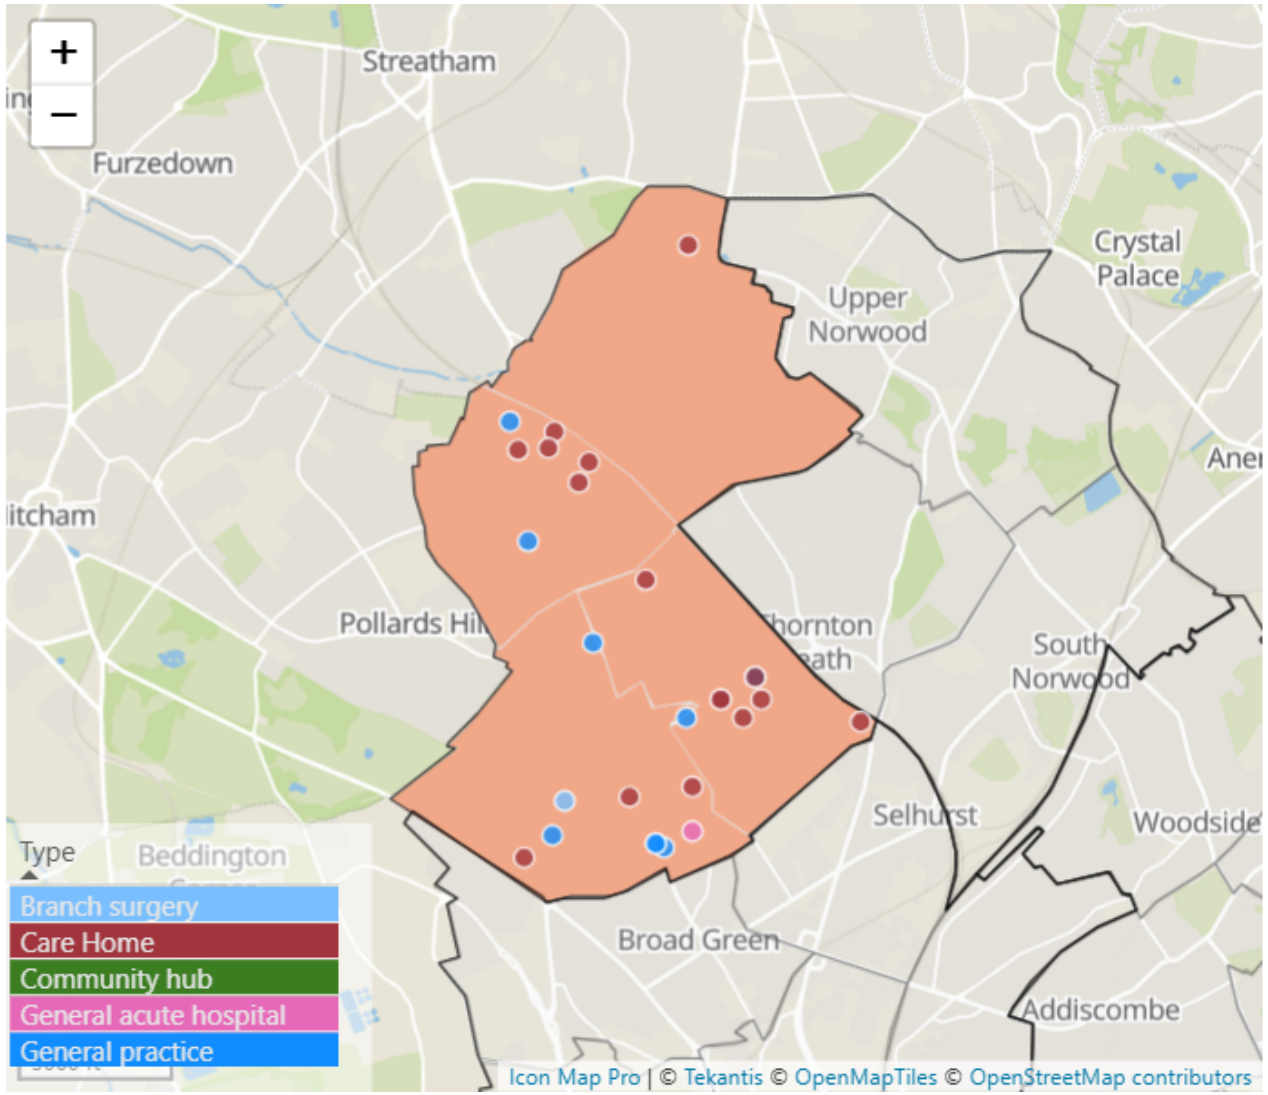

- Bensham Manor
- Norbury & Pollards Hill
- Norbury Park
- West Thornton

GP Surgeries

North West: key information

Population

61,815 resident population (ONS mid-2024).

68% of registered patients living in the North West are registered with a GP in the same neighbourhood.

Compared to other neighbourhoods of Croydon:

- High proportion of young people (24%)
- Lowest proportion of population with a White British ethnic group (16%)
- Largest proportion of population with an Asian / Asian British ethnic group (30%)
- Largest proportion of population with an 'other' ethnic group (5%)
- High proportion of small areas with high population density. These tend to be within Bensham Manor, the bottom of West Thornton and the west of Norbury & Pollards Hill wards

Neighbourhood health

Areas of highest deprivation towards the bottom of West Thornton ward.

Life expectancy ranges from 75-82 years (males) and 81-87 years (females).

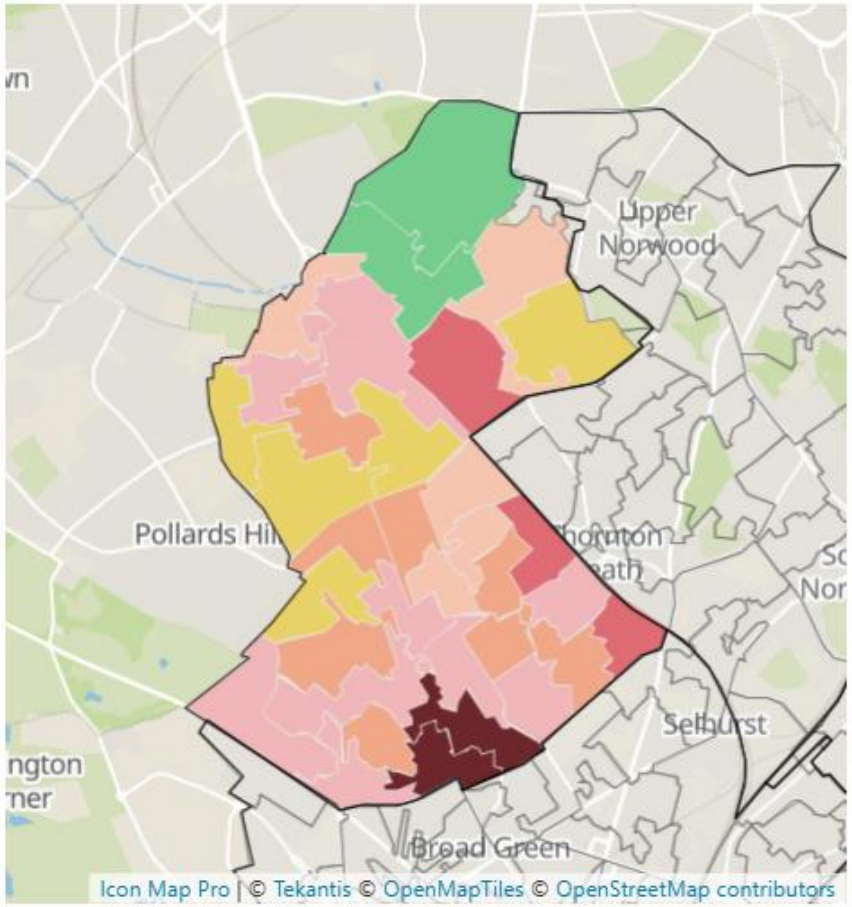

Compared to other neighbourhoods of Croydon:

- Lowest proportions of disabled residents (13%) and residents aged 66+ who live alone (41%)
- Lowest proportions of patients with a mental health issue (10%) or a high blood pressure (13%)
- Highest proportions of; residents with limited English proficiency (5%),overcrowded households (15%), households in fuel poverty (13%), children in poverty (24%), Year 6 children who are overweight (42%), patients who are a heavy drinker (16%)
- High proportion of economically inactive residents (36%)
- Highest proportion of LSOAs in this area who fall into the 20% 'least healthy' areas of the country (94%) or are classed as high or very high relative risk of housing insecurity (68%)

- Lakeside Nursing Home
- Parkview Nursing Home
- Qualities Services Ltd
- Qualities Services Ltd - 17 Kings Road
- Retreat Lodge
- R-H-P Outreach Services - South Norwood Hill
- The Manse Residential Care Home
- Whitworth Lodge

North East: key information

Population

52,681 resident population (ONS mid-2024).

57% of registered patients living in the North East are registered with a GP in the same neighbourhood.

Compared to other neighbourhoods of Croydon:

- High proportion of working-age adults (66%)
- Largest proportion of population with a Black / Black British ethnic group (33%)
- Largest proportion of population with a Mixed / Multiple ethnic group (9%)
- Lowest proportion of population with an Asian / Asian British ethnic group (10%)
- High proportion of small areas with high population density. These tend to be within Thornton Heath, scattered around South Norwood and towards Crystal Palace

Neighbourhood health

Areas of highest deprivation towards the west of Thornton Heath ward.

Life expectancy ranges from 76-82 years (males) and 81-85 years (females).

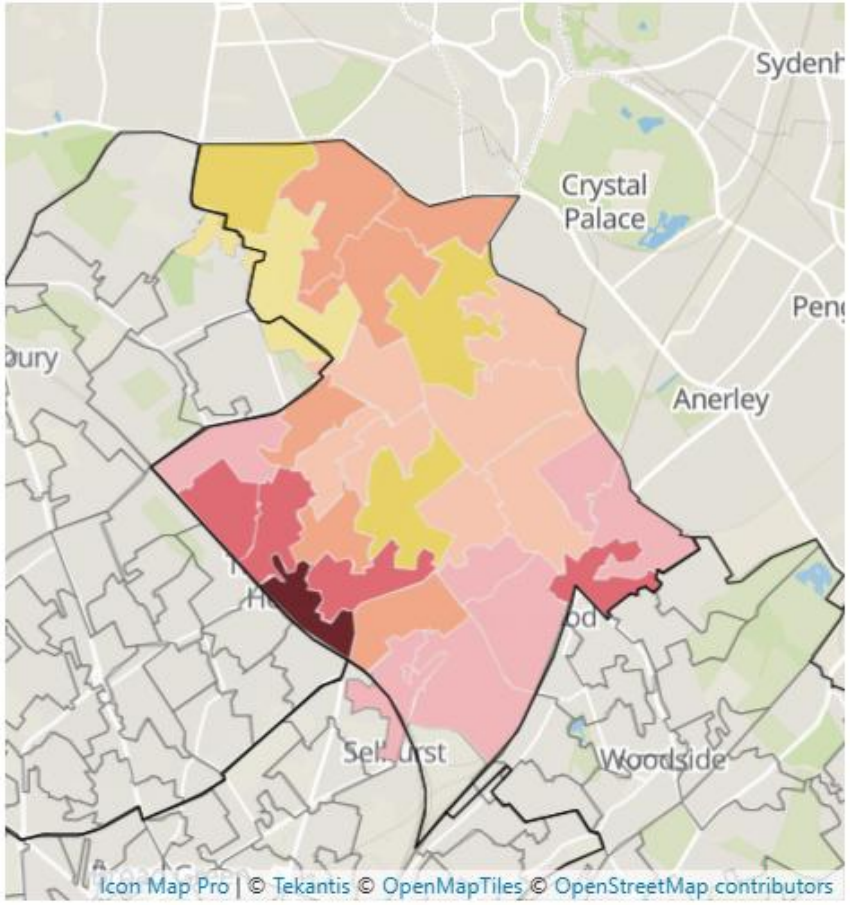

Compared to other neighbourhoods of Croydon:

- Low proportion of unpaid carers (13%) and households with 1+ disabled residents (26%)
- High proportion of households in fuel poverty (11%)
- Low proportion of economically inactive people (32%)
- High proportion of reception-age children who are overweight
- Highest proportion of patients who are a current smoker (16%)
- High proportion of patients who are a heavy drinker (12%)
- Low proportion of patients with a high blood pressure (13%)

Central West: key information

Population

109,501 resident population (ONS mid-2024).

59% of registered patients living in the Central West are registered with a GP in the same neighbourhood.

Compared to other neighbourhoods of Croydon:

- Lowest proportion of older people (9%) and highest proportion of working-age adults (68%)
- Highest proportion of population with a White Other ethnic group (14%)
- High proportion of population with an Asian / Asian British ethnic group (21%)
- Highest estimated population growth across all age groups
- Highest proportion of small areas with high population density. These tend to be within Addiscombe West, Selhurst and Fairfield wards

Neighbourhood health

Areas of highest deprivation towards the east Broad Green and Fairfield wards.

Life expectancy ranges from 74-81 years (males) and 77-86 years (females).

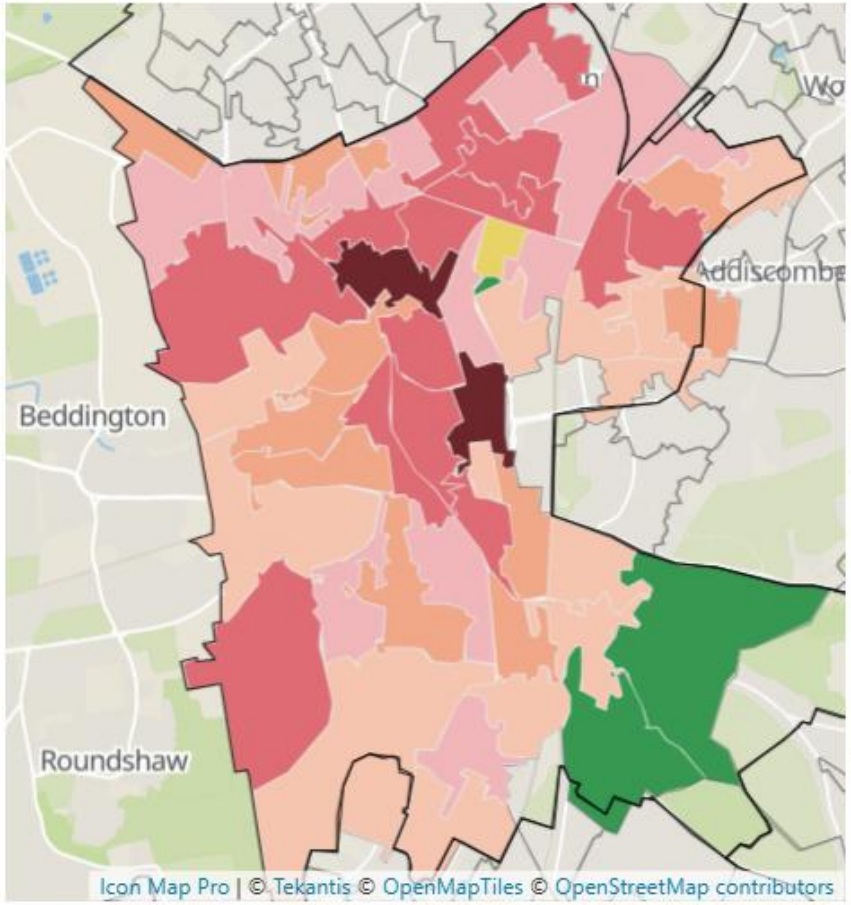

Compared to other neighbourhoods of Croydon:

- Lowest proportion of unpaid carers (12%) and households with 1+ disabled residents (26%)
- Highest proportion of residents aged 66+ who live alone (58%)
- High proportion of overcrowded households (13%) and households in fuel poverty (11%)
- Lowest proportion of economically inactive people (31%)
- Highest crime rate (14 crimes per 100 residents)
- High proportion of Year 6 children who are overweight (42%)
- Lowest proportion of patients with a moderate or severe frailty EFI risk (7%)
- High proportion of patients who are a current smoker (15%)

South West: key information

Population

81,229 resident population (ONS mid-2024).

63% of registered patients living in the South West are registered with a GP in the same neighbourhood.

Compared to other neighbourhoods of Croydon:

- Highest proportion of older people (19%) and lowest proportion of working-age people (58%)
- Highest proportion of population with a White British ethnic group (59%)
- Lowest proportion of population with a Black / Black British ethnic group (10%)
- Low proportions of population with a White Other ethnic group (8%), Mixed / Multiple ethnic group (7%), other ethnic group (2%)
- No small areas with more than 10,000 people per square kilometre

Neighbourhood health

Areas of high deprivation towards the bottom of Old Coulsdon ward.

Life expectancy ranges from 80-85 years (males) and 82-89 years (females).

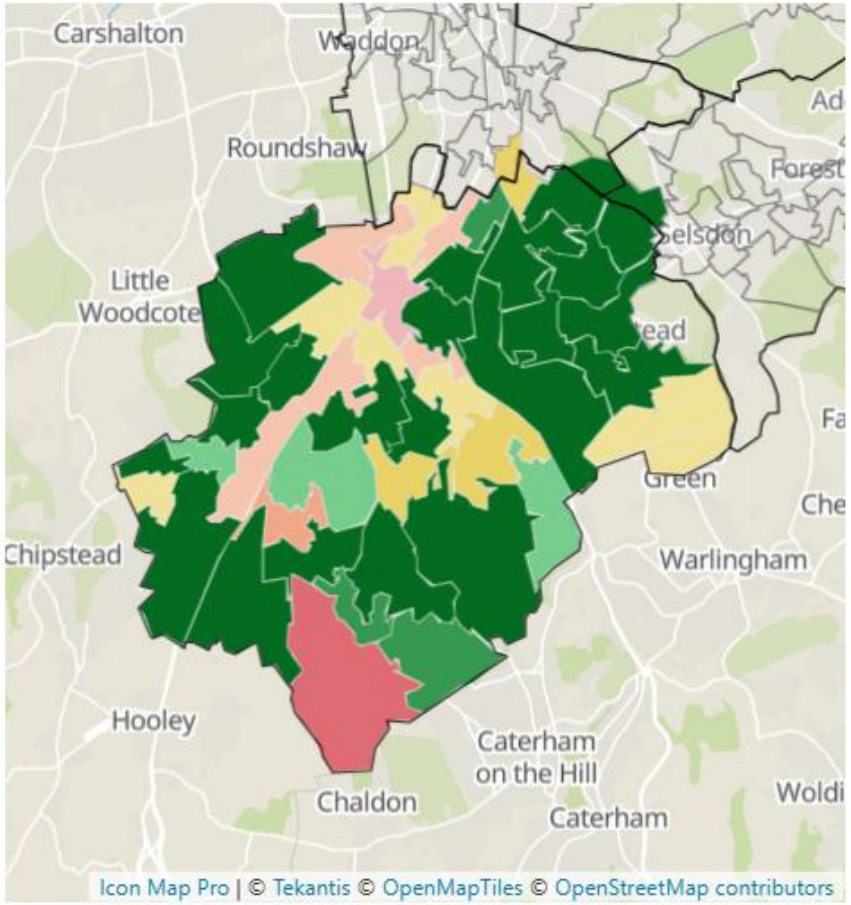

Compared to other neighbourhoods of Croydon:

- Lowest proportions of; residents with limited English proficiency (1%), overcrowded households (4%), residents in bad general health (4%, households in fuel poverty (7%), children in poverty (9%), crime rate, children (in both Reception year and Year 6) who are overweight (17% and 30% respectively), patients who are obese (17%) or a smoker (10%)
- Low levels of households with 1 or more disabled resident (26%), residents aged 66+ living alone (41%) and patients who are heavy drinkers (7%)
- Lowest proportion of LSOAs in this area who fall into the 20% most deprived areas of the country (2%) and into the 20% ‘least healthy’ areas of the country (9%). Only 2% of LSOAs in this area classed as high or very high relative risk of housing insecurity
- High proportion of economically inactive residents (36%)
- Highest proportion of patients with a high blood pressure (15%) and a moderate or severe frailty EFI risk (11%)
